## HEALTH AND SAFETY

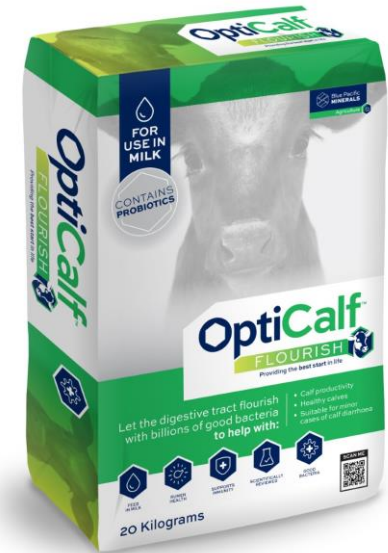

Material safety data sheets are available on request.

## WHAT IS OPTICALF™ FLOURISH?

- **OptiCalf™ Flourish** is finely ground form of Aluminosilicate with a large surface area providing a large surface to gut interface. This allows for rapid absorption of water in the intestines, thereby aiding in the treatment of minor cases of diarrhoea.\*
- **Kemin® CLOSTAT®** is a patented strain of Bacillus subtilis PB6, with proven potency across various applications, and species, providing a guaranteed level of beneficial probiotic bacteria, to assist with the maintenance of health and productivity of animals. For best results, feed daily to maintain optimal intestinal microflora levels.
- *\*Scientific references available upon request*

## DIRECTIONS FOR USE AND DOSE RATES

- **OptiCalf™ Flourish** is designed to be fed to bovine calves only. This product is designed to be added to milk.
- For minor cases of calf diarrhoea add 10gm per calf, per day to milk.
- **OptiCalf™ Flourish** is suitable for use without veterinary advice only in the treatment of minor cases of diarrhoea.
- If **OptiCalf™ Flourish** fails to alleviate the condition being treated, seek veterinary advice.
